Habitat Enhancement

Conservation Programs

Landowner Outreach and Education

Sotoyome Resource Conservation District has been helping rural and agricultural landowners conserve their natural resources since 1945.

November 2011

AUSTIN CREEK WATERSHED FORUM & PUBLIC MEETING, *Austin Creek*

This meeting will provide landowners with information on current projects and programs in the watershed including sediment reduction, fish habitat improvement and water quality monitoring. Landowners will also have an opportunity to hear about the RCD's upcoming and future programs related to water conservation.

For further information and registration, please contact Francesca Innocenti at finnocenti@sotoyomerccd.org or 707.569.1448 x107

January 2012

INSTALLING AND MAINTAINING NATIVE RIPARIAN PLANTS, *Mark West Watershed*

Join Sotoyome RCD staff for this hands on demonstration of installation methods for native riparian plants. Learn about the benefits of using riparian vegetation to maintain healthy watersheds and the surrounding land. We will discuss planting techniques, appropriate plant use, maintenance, and materials needed.

For further information and registration, please contact Playalina Nelson at: pnelson@sotoyomerccd.org or 707.569.1448 x108

TBD

RURAL ROADS IMPROVEMENT, *Maacama and Mark West Watersheds*

Learn about our Rural Roads Improvement Program. Techniques will be discussed on how you can improve your property's rural roads including reduction of erosion and decreasing maintenance. This workshop will include a field visit to see an upgraded rural road.

For further information and registration, please contact Andy Casarez at:
